Panasonic LED

Panasonic LED – Perfectly brilliant, for generations to come

Creating the perfect light takes patience, time, effort and foresight, just to name a few. And when they all come together, it creates a light that's safe, comfortable and lasts forever.

With its century of experience in designing life-enhancing lighting solutions, Panasonic brings you world-class LEDs. They are a symbol of an all-round, in depth approach that assures you impeccable quality, unmatched style and carefully crafted lighting for all your needs. Panasonic LEDs. Perfectly brilliant, today and always.

Panasonic LEDs

Safety
for generations

- Surge Protection
- Wide voltage range
- Fire resistance

Comfort
for generations

- Low glare
- Uniform lighting

Long life
for generations

- Consistent light output
- Better heat dissipation

SAFETY

IEC Standards 60598 (Safety) & 61347 (Performance)

Confirmed to BIS standards, IS 16102 (Part1),
IS 10322(PART 5/SEC 1), IS 15885(PART 2/SEC 13).

Surge Protection

A Panasonic LED's driver has a surge voltage resistance upto 2.5 kV, which protects the light against strong thunderstorms.

Wide Voltage Range

Wide input voltage range (80-400V)*

*LED Bulb (95-330V),

Colour-changing panel light (80 - 330V)

Voltage fluctuations are common in most places in India, so Panasonic LEDs have a wide operating voltage range.

Fire Resistant

Panasonic LEDs use a Class V0 polycarbonate material which does not catch fire.

This ensures that the fire does not spread to other electrical equipment during short circuits.

COMFORT

Low Glare

Glare can lead to discomfort. That's why Panasonic LEDs have a high quality diffuser and smart design for glareless lighting, making them best suited for the home.

Uniform Lighting

Panasonic LEDs have a uniform arrangement of LEDs and use a wide diffuser to ensure uniform lighting.

LONG LIFE

Consistent Light Output

With the UV-Stabilised Polycarbonate Diffuser, light output remains the same for a long time, which also helps the diffuser from yellowing.

Better Heat Dissipation

High quality housing and design lead to better heat management and maintain the initial brightness for longtime up to 50,000 burning hours.

Heat is drawn away from the light module towards a heat sink, where it dissipates out from the fixture.

HIGH POWER FACTOR
